Summary

Detail-oriented MCA graduate specializing in AI, Machine Learning, and modern software engineering. Experienced in training and deploying machine learning models, developing secure full-stack platforms, and integrating AI into automated, scalable web applications.

Education

Bangalore Institute of Technology

Master of Computer Applications (CGPA of 9.64)

2024 - 2026

Bengaluru, India

JSS College of Arts, Commerce and Science

Bachelor of Computer Applications (CGPA of 9.1)

2021 - 2024

Mysore, India

Experience & Training

Junior Software Development Intern | Edutainer (Remote) | Github

Feb 2026 – May 2026

- Completed structured full-stack training in React.js and Python to earn a professional certification.
- Engineered **SkillTrade**, a decoupled peer-to-peer platform featuring a responsive React frontend and a FastAPI backend.
- Implemented secure JWT/bcrypt authentication and utilized Beanie ODM for streamlined MongoDB data mapping.

Projects

AI-Powered Precision Agriculture Advisor | Github

- Developed an ML-based system for crop recommendation, yield prediction, and CNN-based disease detection.
- Integrated OpenMeteo APIs to automate irrigation planning and real-time agricultural decision-making.
- Engineered a scalable web platform to provide data-driven insights for sustainable farming practices.

AI Code Quality & Security Gate with CI/CD Enforcement | Github

- Built an AI-powered code quality & security gate using FastAPI for static analysis, vulnerability detection, and risk scoring.
- Integrated CI/CD enforcement with GitHub Actions to block insecure code via PASS/WARN/BLOCK decision system.
- Implemented AI-driven architectural advisory using Groq for multi-file project analysis and secure coding recommendations.

Event-Driven Real-Time Hyperlocal Commerce Orchestration System | Github

- Architected a full-stack platform featuring real-time order orchestration and inventory sync via Socket.io.
- Built an event-driven lifecycle with specialized dashboards for Customers, Vendors, Admin, and Delivery.
- Optimized system for low-latency updates and reliable state transitions across a multi-user ecosystem.

Technical Skills

Languages: Python, JavaScript, HTML, CSS, SQL, Java

AI, ML & Data: TensorFlow, Keras, Scikit-learn, OpenCV, XGBoost, CatBoost, Pandas, NumPy

Frameworks/Libraries/Tools: ReactJS, NodeJS, Bootstrap, TailwindCSS, Data Structures and Algorithms, JIRA, Git, Github, Express, Jenkins, Docker, Mongo, CI/CD

Certifications

- Certificate Training for the Bolt IoT's Web Development training, Nov 2023
- Oracle Database Administration from Zero to Hero - L&T EduTech
- IBM DevOps and Software Engineering – IBM, Coursera
